RIGHT PAY ON TIME

We make payroll administration child's play

EMPATHY CREATES DEVELOPMENT

WE MAKE PAYROLL ADMINISTRATION CHILD'S PLAY

There are many ways of calculating your employees' pay. Some are easier than others, and ours is the easiest. Especially if you already use SameSystem to handle your everyday administration and staff planning tasks.

Together with SameSystem, we have developed a method which makes it easy for our customers in the retail sector to calculate their staff's pay.

The solution is based on the best of two worlds, combining BDO's expertise in bookkeeping and payroll administration with SameSystem's expertise in IT systems for the retail sector.

IT'S THAT EASY

If you choose to make use of this solution, all payroll administration is handled via the data already available in your SameSystem solution.

All that is needed is therefore an initial configuration of SameSystem and the collection and creation of certain master data for your staff in the system. Naturally, this can be done by us.

In BDO Service and Support, we have considerable experience of payroll administration and many dedicated employees who work in the area.

THE SMALL PRINT

The fees described above are based on the following assumptions and reservations:

- ▶ Your SameSystem must be fully integrated with the payroll system so that variable payroll data can be transferred automatically.
- ▶ Employee master data must be easily accessible for transfer to the payroll system. A special BDO form must be used to create employee master data.
- ▶ Two-year contracts must be signed.
- ▶ The figures mentioned are exclusive of VAT and will be adjusted annually on 1 October by an amount corresponding to the net price index for the private sector.
